Press Release

All the 695 hospitals and health centres of Indian Railway across the country have been successfully integrated with the “Ayushman Bharat Digital Mission” (ABDM).

The integration has been achieved by combining “Hospital Management Information System (HMIS)” already implemented earlier by RailTel in Railway hospitals with “Ayushman Bharat Digital Mission” (ABDM).

This significant job has been executed by RailTel Corporation of India, a Miniratna Central Government PSU under Ministry of Railways in collaboration with National Health Authority (NHA)

Railways HMIS becomes one of the first solution to fully comply with all milestones of ABDM and completely integrate with ABDM.

The move will benefit not only around 80 lakhs Railway employees and Railway pensioners and their family members but also help general public to draw benefit of health care facilities across different Railway hospitals in the country in a seamless digital manner

In a major step at fulfilling the implementation of one of the path-breaking projects of Hon’ble Prime Minister namely, “**Ayushman Bharat Digital Mission**” (ABDM), all the 695 hospitals and health centres of Indian Railway across the country have been successfully integrated with the ABDM. The move will not only benefit around 80 lakhs Railway employees and Railway pensioners and their family members in accessing health care facilities of other hospitals integrated with ABDM additionally, but also enable general public to draw benefit of health care facilities available in Railway hospitals and health centres in a seamless digital manner. If Railway patients are going outside Railway Health System to some other hospitals integrated with ABDM for specialised treatment anywhere in the country, then with the help of this integrated system, the exchange of medical records will be facilitated digitally, expeditiously and seamlessly making things easier, faster, hassle free and efficient for beneficiaries or patients.

This significant job of integration of Railway health system with ABDM has been executed by RailTel Corporation of India, a Miniratna Central Government PSU under Ministry of Railways. It has been accomplished in collaboration with National Health Authority (NHA), the apex body responsible for implementing “**Ayushman Bharat Digital Mission (ABDM)**” to create a National Digital Health Eco-system. ABDM aims to develop the backbone necessary to support the integrated digital health infrastructure of the country. It will bridge the existing gap amongst different stakeholders of Healthcare ecosystem through digital highways.

Earlier, in a mega exercise, RailTel had implemented a Web-Based, Multi-Module, Feature-Rich, Sophisticated, Software System Called “**Hospital Management Information System (HMIS)**” in all the 695 hospitals and health units of Indian Railways across the country. It has made railway health system more transparent, effective, efficient, accountable & patient-friendly. This HMIS system of Railways was then also made fully compliant with ABDM system. As a next step, RailTel and NHA have now successfully integrated these two systems for the benefit of patients and health administration.

Under Railway HMIS system, one mobile app namely, “**HMIS Patient Mobile App**” has also been created for ensuring easy information access to patients related to their OPD Registrations, Doctor Prescriptions, Lab Reports, Self-Registration etc. With this, the patients have been empowered to get easy access to all their Health Record anytime they need them.

RailTel collected the details of all the Health Facilities (HFR) and Healthcare Professionals IDs (HPR-IDs) from Railway users and coordinated with NHA team for backend assignment of Facilities with Facility Managers. Under the integration of ABDM & Railway HMIS, all the four components of ABDM have been implemented namely, ABDM Health ID (ABHA: Ayushman Bharat Health Account) of beneficiary, Healthcare Professional Registry (HPR), Health Facility Registry (HFR) and Personal Health Records (PHR).

Railways HMIS becomes one of the first solution to fully comply with all milestones of ABDM and completely integrate with ABDM.

Railways HMIS Mobile App is provided with the facility for Railway Medical Beneficiaries to generate ABDM Health ID. Railway HMIS users will additionally download another app called “**ABDM Personal Health Record Mobile App**” to take advantage of ABDM Ecosystem.

Railways HMIS solution already has the functionalities to link the Medical Records of Beneficiaries to ABHA Health ID. The linked records can then be viewed in ABDM Personal Health Record Mobile App and can also be shared with different Hospitals as per the requirement. However, the personal records can be shared strictly with the consent of the concerned patient.

RailTel has given extensive Demonstration and Training to Railway Users about ABDM since last one month to ensure smooth integration of the two systems.

Talking about it, Sh. Puneet Chawla/CMD/RailTel said: “RailTel is committed to play a major role in the digital transformation activities taking place in the country and in Digital India Initiative of Govt. of India. The company recently completed the implementation of “**Hospital Management Information System (HMIS)**” in all the 695 Railway Hospitals and Health Centres across the country which has proved to be a game changer for the Railway’s health system. Now, integration of railway HMIS with ABDM is another milestone which will help beneficiaries reap the benefits of ABDM eco system in a seamless digital manner. Such integration of hospitals with ABDM will gradually ensure reach of good health facilities to every citizen in the country and provide them the best digital health care.”

About RailTel

रेलटेल कॉर्पोरेशन ऑफ़ इंडिया लिमिटेड (भारत सरकार का उपक्रम)

RailTel Corporation of India Ltd. (A government of India Enterprise)

www.railtelindia.com
